ETB Developer: Accuracy, Transparency, Objectivity

The gold standard for financial and utility rate analysis of commercial solar and energy storage projects. Streamline your sales processes and create professional proposals.

- Precise financial analysis
- Create customized, detailed proposals in minutes
- Always up-to-date utility rates with an in-house database
- Best-in-class customer service and support

scanify

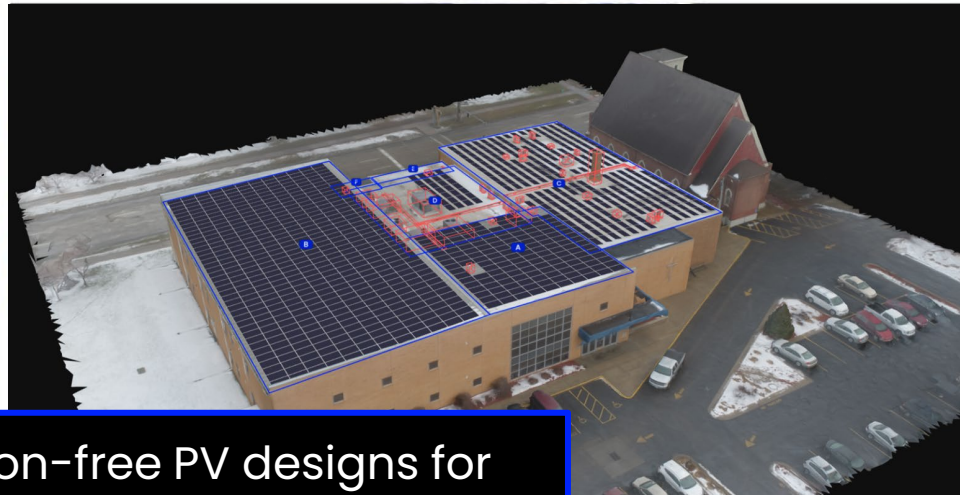

energy toolbase

- Cutting edge PV design
- Trusted modeling capabilities
- Advanced & precise design & layout capabilities
- Accurate and transparent financial analysis
- A unified platform to simplify design and analysis
- Reduces the risk of costly project errors

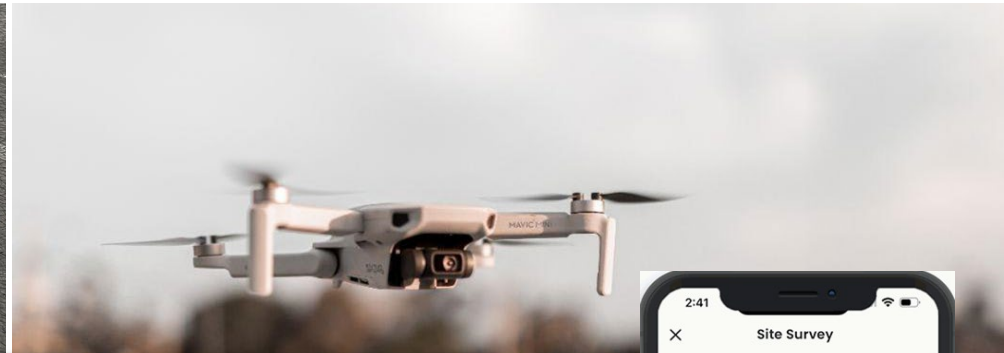

Who Are We?

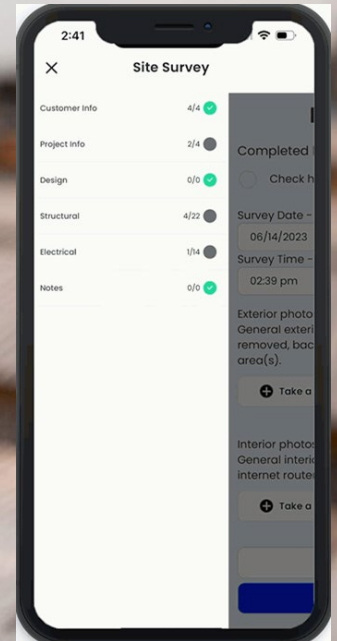

Scanfly powers revision-free PV designs for quality-obsessed developers.

PV Design & Field Operations Platform

- Minimize roof climbs
- Reduce site survey time by 90%
- Merge field and design data on one platform
- Eliminate revisions and change orders

Photorealistic, To-scale 3D Models

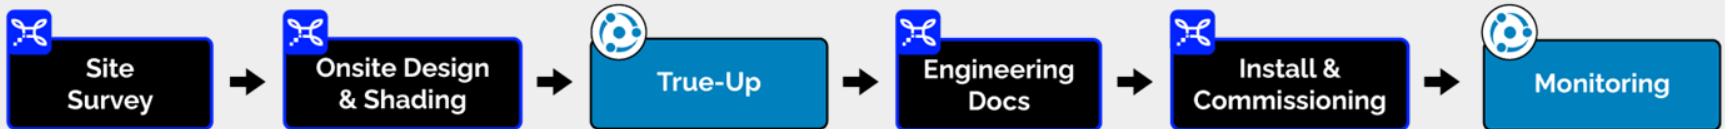

A Seamless Workflow

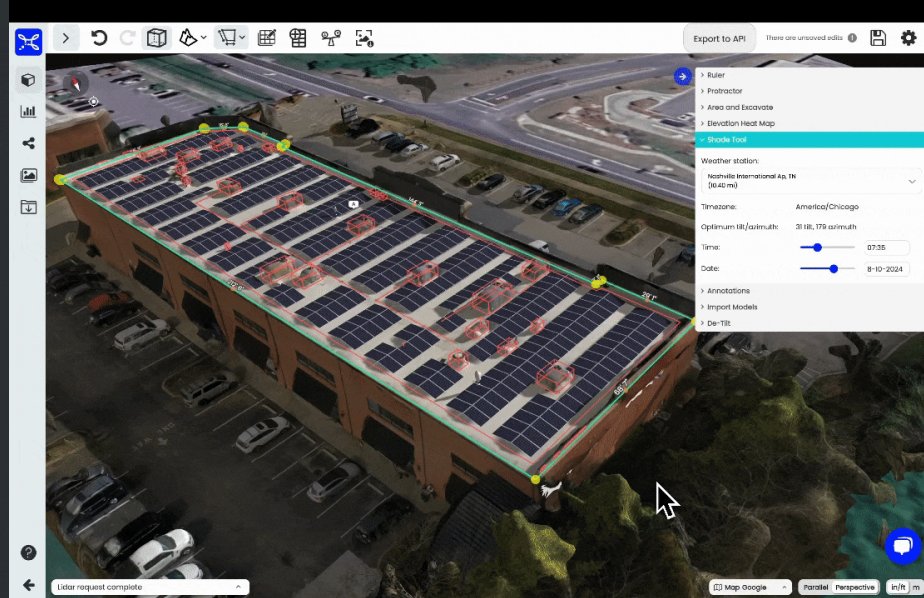

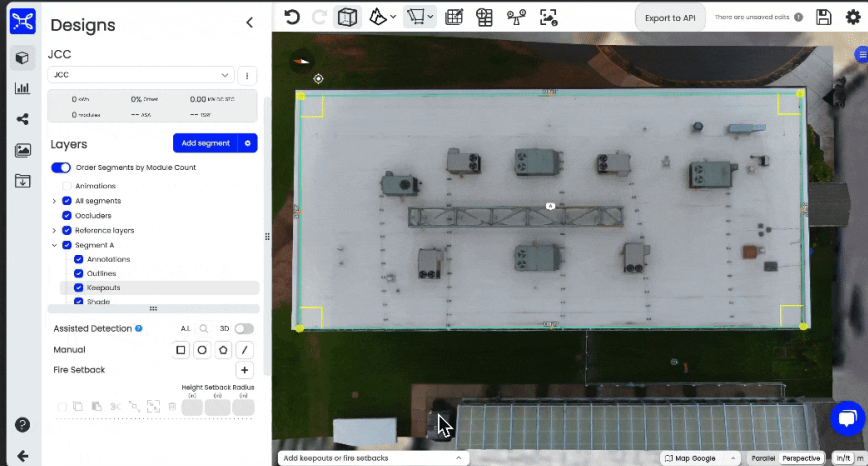

PHASE 1: FRONT END (SALES)

PHASE 2: BACK END (OPS)
